coder accuracy

5.6

encounters, per coder, per hour

+240

diagnosis codes added or revised based on documentation related to HCCs presented

ABOUT CURATION HEALTH

Curation Health helps providers and health plans navigate and scale from fee-for-service to value-based care. Our advanced clinical decision support platform and advisory services for value-based care drives more accurate risk adjustment and quality program performance by curating and delivering relevant, real-time insights to the clinician and care team. For more information, visit www.curationhealth.com.
